

Our Initial Exchange Offering (IEO) ended in March 2020. We are happy to report that we are listed on the Beldex Exchange (www.beldex.io) and intend to list on more exchanges in the near future. Although past performance of our token does not forecast its future performance, we are happy to report that at one point our token traded over 3x the IEO price.

Please continue to monitor this page in the future for additional rounds of PREDIQT token offerings.

Note: This document is for information purposes only. It is not a prospectus nor a solicitation for investment and it does not pertain in any way to an offering of securities in any jurisdiction. PQT utility tokens are not an investment or security of any kind. They do not represent ownership or shares in PREDIQT nor any other entity. They have no rights whatsoever including no voting, no dividends, and no claim to future profits.

Tokens will not be offered in the United States, China, Japan, any sanctioned countries or any countries that do not allow the offering of cryptocurrencies.
